**Subject:** RE: Lead Acid Battery Recycling Act

Hi Deldi and Ana,

I heard from John Scandura today that this proposal was funded and it will reside as a project within the Exide group. John didn't know if any specific plans, people, or sites have been identified, but when they are I will be interested in chatting.

Ana, let me know if you know anyone I can contact to find out about this work.

Thanks,

**Sharon Bowen Murray**, Site Assessment Manager/National Priorities List Coordinator

**Subject:** Lead Acid Battery Recycling Act

Dear Ana and Sharon, via email I want to introduce you. Sharon, Ana is DTSC's Associate Director for EJ and Tribal Affairs. She plays a leading role in DTSC's Exide activities and manages DTSC's EJ team.

Ana, Sharon works in our Superfund Division's Site Assessment team—when I came on board to Region 9, Sharon was then a member of the EJ team. Sharon has been tasked by Enrique to get a handle on potential lead hot spots.

Ana, when we were on the Exide Advisory Group call, I believe you mentioned an effort within DTSC to do some state-wide assessment work related to lead smelter operations? I did a little online searching and found this budget change proposal which seems to be relevant.

Was the proposal funded? If so, that is excellent news. I wonder if would be useful to compare notes on this topic? What do you think?
